<u>SOFTWARE TRACEABILITY SYSTEM</u>

## **Specifications**

**Minimum System Requirements:** Windows XP or greater

Used to set up a custom job file for each indicator database you need to export. Manually or automatically run the job file by setting a predetermined time. Windows® Task Scheduler can run the job file before you get to work and have an uploaded Excel® spreadsheet in your email inbox.

## **Standard Features**

- · Setup using an export job wizard
- Connect using RS-232, RS-485 or Ethernet TCP/IP
- · Program will connect to the indicator and upload the current database structure
- Select the desired database
- Export database table file types: delimited text, XML, XLS, HTML
